

Obtain oil free air with lubricated compressors

Includes:

Aftercooler with air driven fan motor

- Lowers temperature of air leaving the compressor to within 10 to 15°F of ambient temperature
- Eliminates 75% of water

Separator/filter

- Removes bulk liquids
- Prefilters the air for finer filtration
- Large in depth bed eliminates heavy particulate loads

Ultra-high efficiency coalescing type oil removal filter

- Removes fine oil droplets (aerosols) and solid particles 0.01 microns and larger
- Oil content after filtration: 0.001 ppm w/w

Easy to use

- Mounted on rental skid
- Piped with convenient in/out connections
- No power required
- Automatic condensate drains
- Gauges on filters indicate need for element replacement

Applications

For use with portable compressors:

- Construction
- Bridge repair
- Sandblasting
- Painting

For use in industry:

- Manufacturing plants
- Refineries
- Shipyards
- Paper mills
- Chemical plants
